

## Ultracell® Battery 12v 7ah UL7-12

### FEATURES (BATTERIES)

|                        |                                                                        |
|------------------------|------------------------------------------------------------------------|
| Useful life            | <b>5 years (at 20°C)</b>                                               |
| Rated voltage          | <b>12V</b>                                                             |
| Capacity               | <b>7Ah</b>                                                             |
| Rated capacity         | <b>7.0 / 6.51 / 6.0 / 5.37 / 4.55Ah (20 / 10 / 5 / 3 / 1 hr a 25°)</b> |
| Standby use            | <b>13.5V ~ 13.8V</b>                                                   |
| Cyclic use             | <b>14.4V ~ 15V</b>                                                     |
| Initial intensity      | <b>Less than 2.1 A</b>                                                 |
| Intensity of discharge | <b>105 A max. (5 s)</b>                                                |
| Internal resistance    | <b>23mΩ</b>                                                            |
| Connection type        | <b>F1 , F2 opcional</b>                                                |

### MATERIAL AND DIMENSIONS

|            |                         |
|------------|-------------------------|
| Dimensions | <b>151 x 65 x 99 mm</b> |
| Material   | <b>Lead acid (VRLA)</b> |
| Net weight | <b>2000 g</b>           |
